Standard you're Assessing:

Your Standard:

- 6-8.RH.1 Cite specific textual evidence to support analysis of primary and secondary sources
- 6-8.RH.8 Distinguish among fact, opinion, bias, and reasoned judgment in a text.

Your Assignment/Project Description:

- Your project description: Students will analyze sources. Using their textbook and various resources online, students will each analyze one source for validity and potential bias, and determine whether it is a primary or secondary source. They will then be able to explain the event in their own words, using the sources they have gathered, and write a short exit ticket about the event.

Your Rubric: *(Note: Please just type in the table below, adding more columns and rows as you find necessary. I cannot have an image of your rubric, as it doesn't allow me to comment on specific portions. This 2-minute tutorial will show you the basics for how to change properties of a table.)*

Checklist for your rubric:

- ☐ I have three or more subskills found within the standard. (This might be easier to identify multiple subskills within standards for 2nd grade and higher.) Check out this 4-minute explainer video.
- ☐ I've named the subskills/categories in the left column and explained what I'm looking for in the right columns.
- ☐ I start with an "I can" statement and write it in first person to make it student-friendly.
- ☐ Language is student-friendly and appropriate for the grade level it will be used for. (E.g., if it's for kindergarten, it might be mainly pictorial, as they might not be able to read it otherwise)
- ☐ Everything I'm assessing matches the standard I chose. (If not, add it to the directions, but not to the rubric. E.g., adding color to a presentation or having an image on each slide).
- ☐ My language is objective, so other raters would score something similarly because it's clear what I'm looking for.

Use of multiple valid sources- expectation?

Your Standard:

- 6-8.RH.1 Cite specific textual evidence to support analysis of primary and secondary sources
- 6-8.RH.8 Distinguish among fact, opinion, bias, and reasoned judgment in a text.

Levels of Proficiency → Categories/Subskills ↓	Proficient	Emerging	Not Yet
Analysis of the Source	I can accurately determine between all of the following; fact, opinion, and bias	I can partially determine what is fact, opinion, or bias.	I failed to determine what is fact, opinion or bias
Differentiation between Primary and Secondary Sources	I can correctly identify the type of source		Try Again
Evidence Provided	I correctly used evidence such as; “the source was written by a person who experienced the event” or “the source is a collection of other sources” multiple times	I correctly used evidence once or twice	I failed to use evidence

- Are there any portions you feel particularly unsure about and would like me to pay close attention to so I can provide support and feedback?
  - Reflect: i think i still need to work on being clear on exactly what is expected of the students, but im not sure how i’d make it any more in depth without using too much technical language.
  - Updated, i think it’s more clear now. This way definitely makes more sense to me

Overall Rubric

Insufficient	Not Yet	Developing	Proficient	Advanced

Little or no work was submitted to show evidence of the assessed concept.	Demonstrates significant gaps in understanding the assessed concept. Still needs substantial guidance and support. Only able to identify a few basic elements or concepts of that being assessed.	Able to communicate partial understanding but some gaps still exist. A basic understanding is evident but key elements or aspects are left out or fail to be elaborated upon.	Demonstrates proficient work based on the concept being assessed. Is able to apply learning and consistently produce evidence to demonstrate understanding.	Demonstrates mastery-level work by being able to flexibly apply an understanding of the concept being assessed. Is able to apply learning to new situations and extend ideas and draw upon real-world applications to classroom use.
